- Drafting operating procedures
- Maintenance of company books and statutory registers
- Company incorporation
- Provision of regulated compliance services
- Provision of outsourced compliance and finance officers
- Provision of regulatory advisory
- Regulatory authorisation services for financial services firms
- ESG and sustainability

Apex Dubai

Established in 2006, Apex Dubai was the first independent fund administrator to be licensed by the DFSA. It has grown steadily in recent years and today services both closed ended and open ended funds handling all asset classes. Our operations team is locally based in the DIFC and is experienced in administering hedge funds, macro funds, fund of funds, fixed income, equities, venture capital, private equity, commodity, FX, derivatives, real estate, and property level accounting.

We can also assist clients looking to incorporate and register within the DIFC. Our solutions include assisting the submissions for the DFSA authorisation process, and providing outsourced compliance, and regulatory support.

Reputation

The DIFC offers its own regulatory regime and a robust legal framework based on that of the UK. Widely regarded as the “hub” of the financial services industry in the Middle East, the DIFC benefits from the diversity and depth of financial services support companies based within it, ranging from large multinational groups, to both local and regional players. The DFSA pro-actively supports the development of the domicile and has introduced a number of new fund structures in recent years to allow managers to establish a wide range of fund types in what is a well regulated jurisdiction.

Why Apex Group?

We are dedicated to driving positive change in financial services while supporting the growth and ambitions of asset managers, allocators, financial institutions, and family offices. For over two decades, we have continually disrupted the industry through our investment in innovation and talent. Today, we set the pace in fund and asset servicing and stand out for our unique single-source solution and unified cross asset-class platform which supports the entire value chain, harnesses leading innovative technology, and benefits from cross-jurisdictional expertise delivered by a long-standing management team and over 13,000 highly integrated professionals.

Regulation

The DFSA is the sole regulator for the DIFC and has worked diligently to develop and expand the local financial services industry. It offers a variety of fund structures, from open to closed ended, and is thus able to accommodate all fund strategies, and investment themes.

The DFSA has a technical, yet entrepreneurial approach which has proven very successful in attracting new managers to the DIFC. There is a willingness to enter into discussion with interested parties and an ability to detail, and meet the timeframes involved in licensing managers and launching fund structures. Global AML standards and investor protection measures are implemented.

Dedicated to the promotion and maintenance of a sound yet responsive regulatory framework, the DFSA is aided by the DIFC having its own independent court system with exclusive jurisdiction over commercial cases within the DIFC. Legislation is based upon Common Law principles, providing a stable and robust architecture that underpins the centre's independence.

Tax and legal

The legal regime in the DIFC is largely based on UK Common Law and is supported by its own highly developed court system. The DIFC is a tax neutral environment with no personal, corporate, or property taxes. This allows both promoters and investors the ability to manage their own tax position without having to deal with local tax legislation.
